A4 / VECTOR

Choose one family. Print and use its complete ID 0 + ID 1 pair.

These tracker sizes worked for me. Making them a bit bigger is fine.

PRINT / CUT / USE

- 1 PICK one family. Use ID 0 + ID 1 from that family. Do not mix families.
- 2 PRINT at 100% for the supplied sizes. These worked for me.
- 3 BIGGER is fine for a lower-res camera, or if the trackers are not showing up.
- 4 CUT on the dotted line. Keep the white border. Mount flat or stick to card if useful.
